

Try our Data Center License Analyzer 30 Days Risk Free!

LICENSE TYPES

- IBM PVUs
- Oracle By-Processor
- SQL Server By-Core/Processor
- Other complex license types

ESI's Data Center License Analyzer was designed to do the work for you, thereby saving countless hours of manual assessments and calculations.

HOW IT WORKS

The Data Center License Analyzer automatically determines how many licenses are required to cover how you have chosen to deploy your software.

FEATURES

- Visio-like designer – fast and easy to use.
- Rules-based engine designed to handle complicated scenarios, Such as IBM PVUs, SQL Server by processor
- Flexible - design your own rules or use rules already designed by ESI – or both
- Handles all types of complex device-based licensing
- Takes into account cores, processors, virtualization, environment, clusters, IBM and Oracle look-ups, software maintenance status, suites, bundles, and more.
- Tolerant of missing input data.

BENEFITS OF USING A SAAS

The Data Center License Analyzer is a module of our SaaS-based Software License Management Solution. You get the full benefit of using a SaaS.

- More cost effective – pay only for what you use
- No hardware or software to buy
- Be up and running faster - all you need is a browser
- Fully secure

TRY IT OUT

We offer a 30 day risk-free trial to let you see how effective the Data Center License Analyzer can be in your environment. Contact us to learn the details.
