

- MIE also includes:**
- *Workflow Automation*
 - *Graphical Workflow and Analyzer Design too*
 - *Data Center License Analyzer*
 - *Self Service Request Portal*

ESI's MIE was designed to seamlessly integrate into your ITAM/SAM initiative to improve your responsiveness to your business. With our value-based focus, we can provide a full ITAM life cycle.

HOW IT WORKS

The MIE platform is fully customizable to your ITAM/SAM initiative using a multifunctional platform to automate processes to save time, money and energy.

FEATURES

- Full Hardware Asset Management
- Full Software Asset Management
- Data Center License Analyzer
- Supports Internal Software Market
- Multi-tenancy
- Multi-format reporting with various scoping and sorting options
- Single login, Multi-level, and Conditional access control
- Highly client customizable
- Graphical Workflow and Analyzer tool

BENEFITS OF USING A SAAS

- The MIE is our complete SaaS-based Hardware and Software Asset Management Solution. You get the full benefits of SaaS by purchasing just what you need.
- Enhance your ITAM/SAM process as opposed to changing to fit a particular tool
 - More cost effective – pay only for what you use
 - No hardware or software to buy
 - Be up and running faster - all you need is a browser

TRY IT OUT

We offer a number of risk-free, time limited trials to let you see how effective they can be in your environment. Contact us to learn the details.
