

**Contact us for a demo TODAY!**

*SRP also features:*

- 10 minute cycle time
- Can be used as a stand alone solution
- Optional Requesting of Additional Entitlements (maintenance)

Did you know that in order to hold a software compliance position, one of the key behavior drivers that must be addressed is the software request and fulfillment cycle?

**DRIVING BEHAVIOR**

If you don't want users finding other ways to get software installed, which results in lack of license documentation and ultimately "compliance drift", you need to provide a means of requesting and acquiring software that is faster and more efficient than any other means. That is where we come in.

**FEATURES**

- Requesting Entitlements
- Exercising Entitlements
- Supports upgrades license types
- Catalog-based
- HTML Portal Look and Feel
- Automated workflow approval notifications
- Shopping cart
- Managing both Server and Workstation Software
- Integrates with popular electronic software distribution systems (ESD)

**BENEFITS OF USING A SAAS**

- The Software Request Portal is a module of our SaaS-based Software License Management Solution and a key element of our Internal Software Market
- You get the full benefit of using a SaaS.
  - More cost effective – pay only for what you use
  - No hardware or software to buy
